Problem Statement

Customers generally follow hectic routine of visiting various banks and getting the bank's estimate in person. Our website's purpose is to ease the user's burden and save their time and energy by displaying all the necessary details at one site. We provide an online business platform for gold chit and chit fund companies.

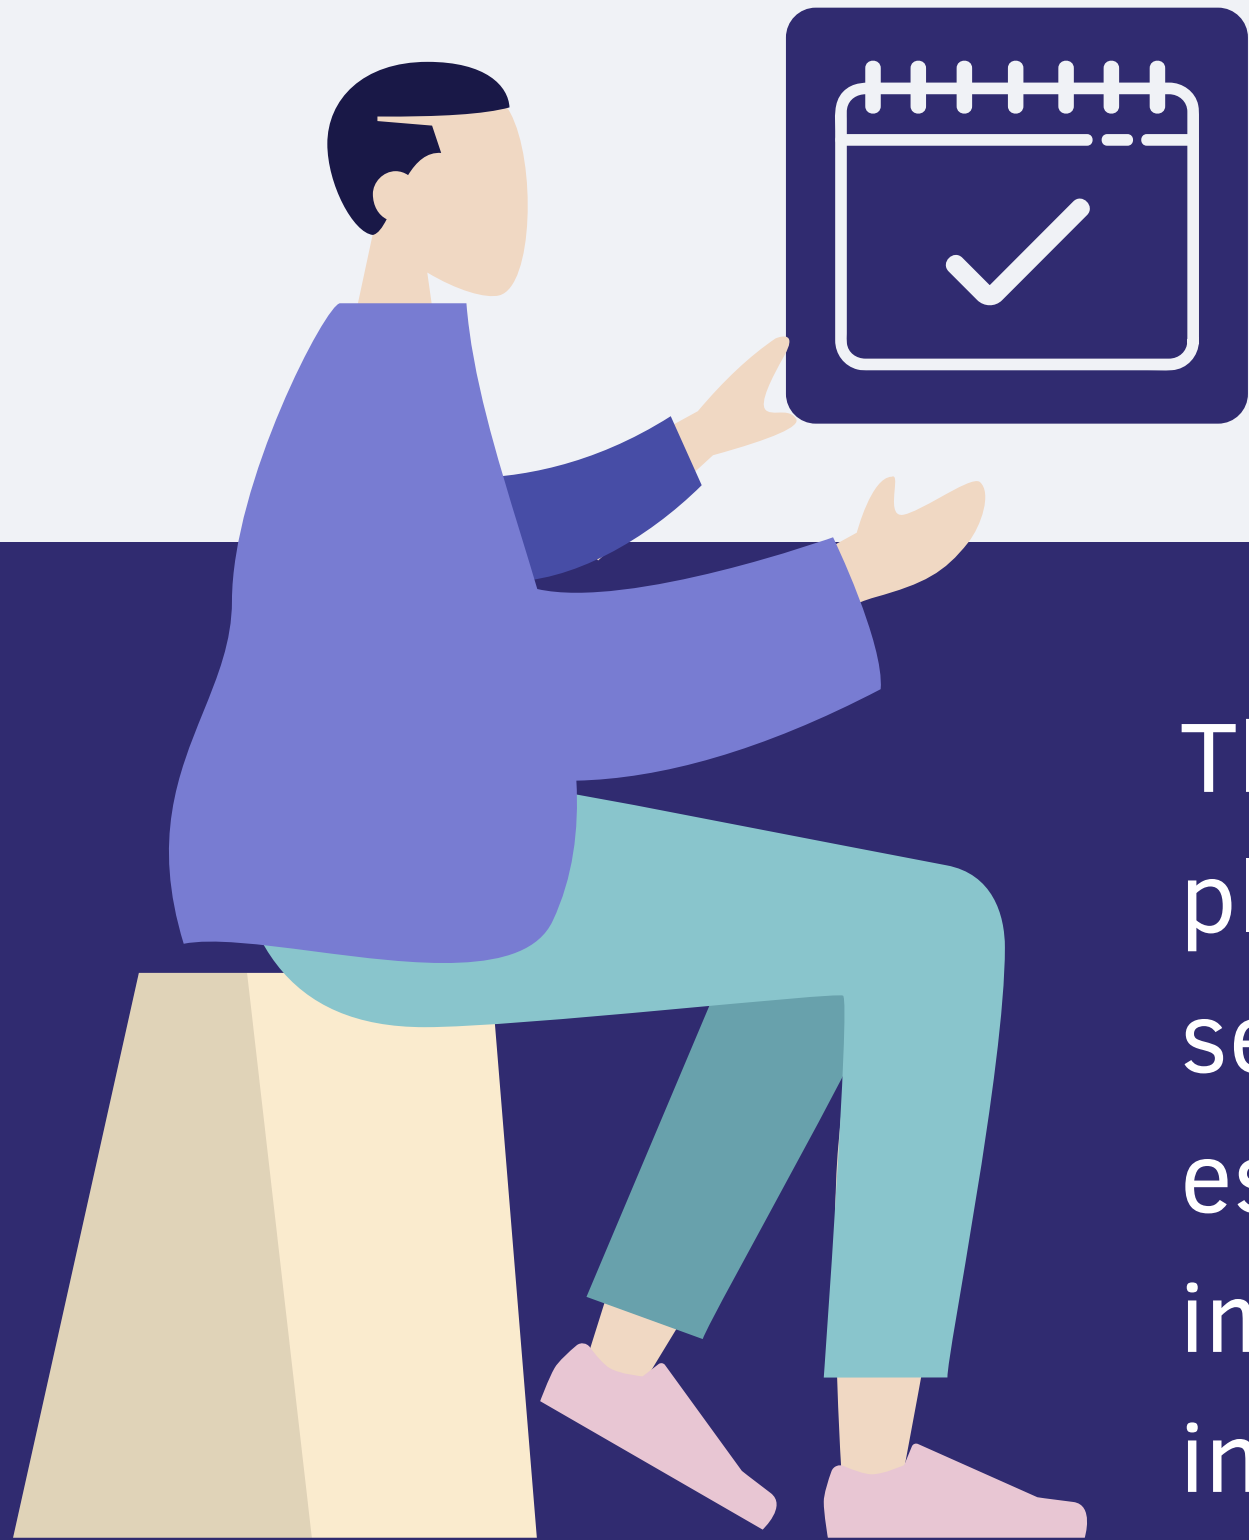

- Our website will provide verified dealers for chit funds and it also provides an approximate estimated amount for the Mortgage based on the user's eligibility.
- Our website provides collective information on various mortgage schemes of several authorized banks.
- Our webpage acts as an intermediate between the user and the chit fund dealer providing both our clients a comfortable business platform.

Proposed Solution

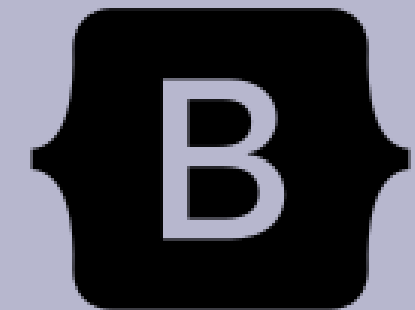

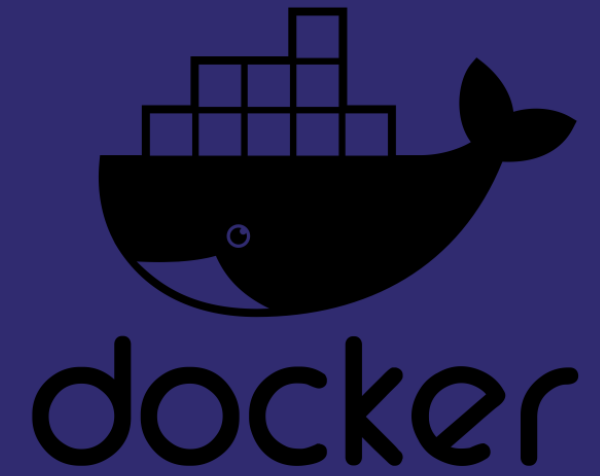

Novelty

The novelty of our project is that it acts as a cross platform for the financial sector and the banking sector which is a new interface in the industry, especially in India . We also have future plans to implement Transactions and convert our website into a web application
